

RIL: A major player in petro field

Reliance Industries is one of the major players in the petrochemical sector in India. It is the flagship company of the Reliance Group and is considered as the largest private sector company of the country. The Reliance Industries manufactures maximum polyester yarn and fiber in the world and also enjoys a high position across the globe for the promotion of major petrochemical products.

History of Reliance Industries: Reliance Industries limited is the main company within the Reliance Group, comprising of the subsidiary companies like the Reliance Petroleum Limited and Reliance Retail Limited. In 1975, the company explored the textile sector and after two years it stepped backwards to produce petrochemicals. Thereafter the Reliance Industries

also got involved in the refining of crude oil. The main manufacturing units of the Reliance Industries are in different parts of western India like at Naroda, Hazira,

Patalganga, and Jamnagar.

Products of Reliance Industries: The Reliance Industries has earned a high benchmark in the production of the petrochemical products like from crude oil to natural gas exploration and production to other variants of petrochemicals. Some of the main prod-

ucts of Reliance Industries are-

- petroleum products
- polyester products
- polyester intermediates
- plastics

- polymer intermediates
- chemicals
- synthetic textiles
- fabrics

Brand Names of the Products of Reliance Industries: Regarding the use of petrochemical product like polymers, the Reliance Industries is a major producer of prod-

uct brands like Repol, Relene, Reclair, Reon, and Relpipe. The company produces Linear Alkyl Benzene under the name of Relab. The other brands of products of the Reliance Industries which have earned popularity in the market are:

- Recrylon
- Recrylic
- Recron
- Recron Stretch
- Recron Cotluk
- Recron Dyefast
- Recron Superblack
- Recron Superdye
- Recron Fibrefill

Performance of Reliance Industries: The Reliance Industries is not only the largest producer of polyester fiber and yarn in the world but it is the fourth largest producer of Paraxylene, fifth largest producer of Purified Terephthalic Acid, and seventh largest producer of Polypropylene.
