

## Royal Village

Royal Village is a mixed-use urban development that encircles Jordan's first planned 'intelligent and energy efficient' luxury residential development. It is the second component of the Royal Metropolis development. Conceived as a safe haven where the troubles and stresses of daily life just melt away in the glow of the beautiful Jordanian sunset, this high quality gated community will provide a full range of lifestyle choices including a clubhouse with several sports options and comprehensive shopping and leisure facilities nearby. Additionally, large landscaped areas, gardens and parks are planned.

Royal Village is a 470,000 square metre development, strategically located in Marj Al-Haman just six kilometres south west of the 7th Circle in Amman en route to the popular tourist destination of the Dead Sea, and just 25 Km from Queen Alia International Airport. This modern, chic, urban mixed-use community is close to the centre of Amman and offers its residents the ultimate in lifestyle, with luxurious residential villas and apartments as well as high-end office space and retail, leisure and recreational amenities. The Royal Village project foundation stone was laid by His Majesty King Abdullah II. In September 2006, Royal Village launched its Head Office and Sales Centre on the project site. The project is jointly promoted and developed in conjunction with Kuwait Finance and Investment Company via Bayan Holding Company.
